

FY20 EHE PROJECT PERCEPTION OF HUB ENGAGEMENT & DISSEMINATION OF FINDINGS

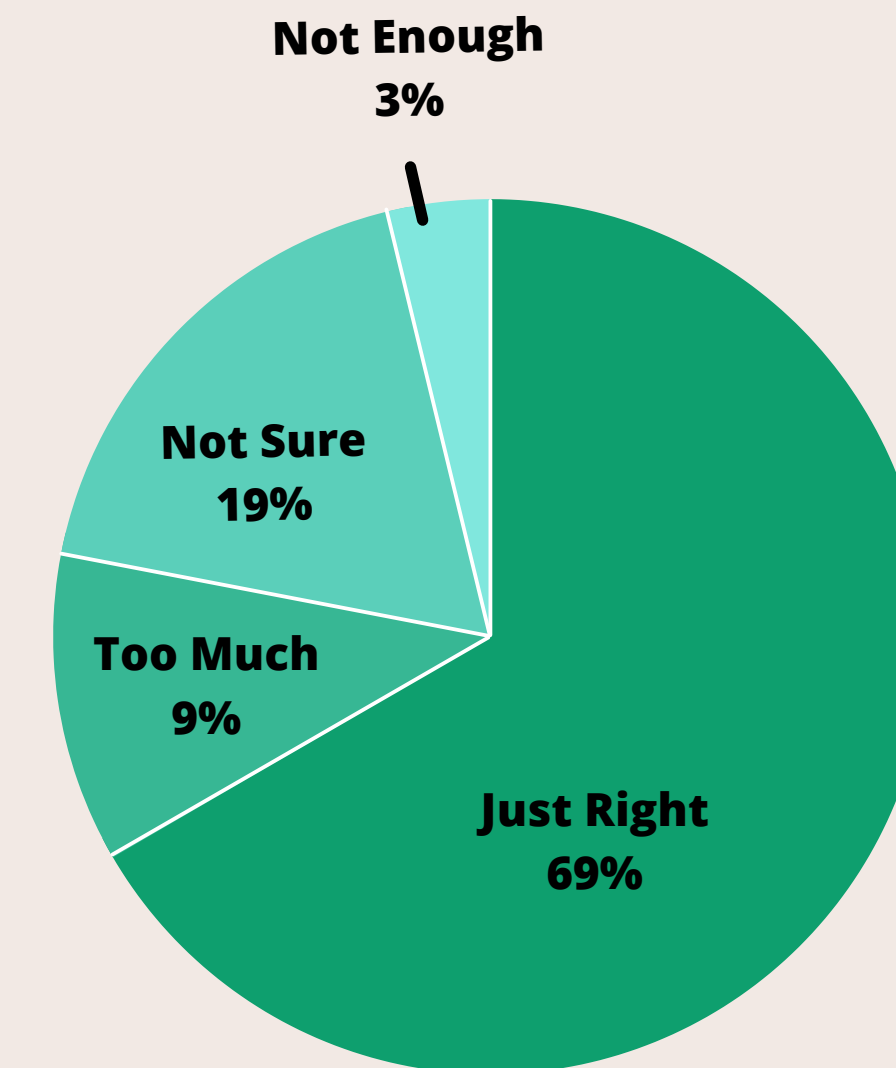

Hub activities were found to be useful and engagement was perceived as positive by supplement projects.

Of projects participating in "Discussions about current EHE project with Hub investigator(s)", 65.5% found it most useful.

Of those who participated in "Research proposal support", 91.6% found it most useful.

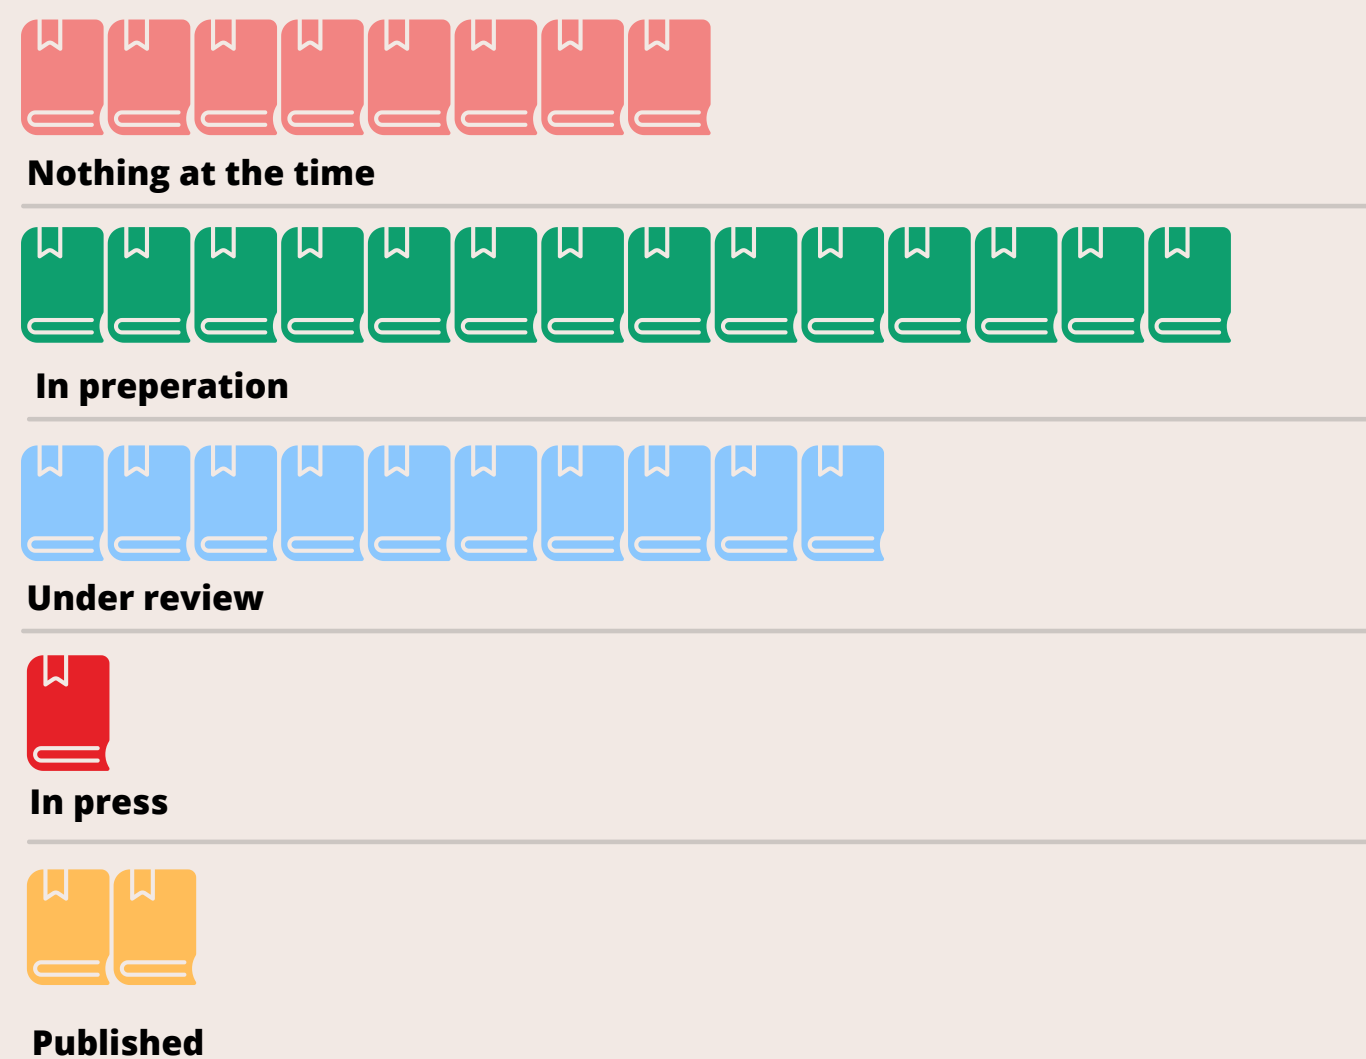

Most projects agreed that the frequency of engagement with their Hub was "Just Right."

The majority of EHE supplement projects have shared their study results and what they learned through various methods.

A great number of EHE supplement projects have taken steps to publish results in a journal.

Study results were disseminated with implementation partners in a number of ways.
